Specialist PI and Clin Neg DDJ at Birmingham

Law Society Clinical Negligence Panel 2015 to date

CEDR accredited mediator 2016

Current Employment

August 2021 to date - University Hospitals Birmingham NHS Foundation Trust, Legal Officer

Area of work - Defendant clinical negligence claims, Coroner's inquests and EL/PL. This part time role involves investigating claims against the Trust and liaising with the Coroner in relation to inquests.

Examples of concluded cases:

2019:

K v An NHS Trust: Acted for child client who suffered brain injury during surgery. Sadly died 18 months later. Pursued claim for parents. Settled for £150,000 at mediation.

H v C Heath Board: Claimant sustained a hypoxic brain injury at birth. Obtained pre-action full admission of liability Client had cerebral palsy affecting mainly one side but also significant cognitive injury affecting her schooling and employment prospects. Claim settled at a RTM for a lump sum of £5,000,000 and periodical payments for care and case management, (£14,500,000 capitalised value), 4 weeks before trial.

2018:

W v D and B NHS Trusts: Claimant born prematurely and sustained hypoxic brain injury due to a delay in diagnosis and treatment of necrotising enterocolitis in the neonatal period. Diagnosed with quadriplegic cerebral palsy and cognitive impairment. Complex issues of causation involving 2 NHS Trusts. Admission of breach of duty made pre-action together with admission of causation of injury. Issue raised regarding effect of prematurity but for the injury. Agreed a process with the Defendants' solicitor to exchange quantum evidence and settled claim at a RTM pre-issue resulting in a saving of costs and quicker resolution. Settled for lump sum of £4,000,000 and periodical payments for care and case management, (£17,000,000 capitalised)

D v N NHS Trust: Delay in diagnosing client (in her 70's) with a brain tumour. Protected party as a result of her injury and also developed dementia which reduced her life expectancy. Significant causation arguments regarding the extent to which the dementia was caused/accelerated by the delay in treatment of the brain tumour. Case settled 4 months before trial for £400,000.

C v W NHS Trust: Claimant sustained a hypoxic brain injury at birth resulting in quadriplegia, with spared cognition. Pre-action admission of liability. Settled at mediation for £4,750,000 and periodical payment for care and case management, (£17,500,000 capitalised), 1 month before trial.

A v S NHS Trust: Consent case regarding an elective bilateral mastectomy due to future risk of cancer. GMC referral of treating clinician. Settled for £250,000. M v S NHS Trust Client previously advised by 3 other firms. Case 10 years old and not issued. Delay in diagnosis of MRSA leading to osteoarthritis. Significant funding and limitation issues to overcome. Settled for £300,000.

J v S: Alleged failure by optician to identify age-related macular degeneration, leading to visual impairment. Heavily defended by insurer. Settled 1 week before trial for £25,000.

2017:

H v P NHS Trust: Delay in diagnosis of compartment syndrome leading to above-knee amputation. Case 2 years outside limitation when instructed. Significant loss of earnings claim requiring forensic accountancy expert evidence. Settled before trial for £3,000,000.

M v B NHS Trust: Client suffered hypoxic brain injury at birth. No physical injury, but cognitive impairment leading to client being vulnerable and having reduced earning capacity. Heavily defended towards a split trial. Key medical records missing. Settled shortly before trial for £1,850,000, with no admissions.

Testimonials

Chambers review: "commended for being "hard-working and very thorough." Susan assists with an impressively wide range of complex matters, including brain injury, birth injury and delayed diagnosis cases."

Legal 500 review: "Susan is an extremely experienced and well known clinical negligence practitioner who is respected by peers and (importantly) opponents".
